中文

现在人们普遍认为，在选择大学或进一步学习时，有很多因素要考虑，比如大学的声誉或设施。对我来说，最重要的因素是选择一个有竞争力的专业。有几个理由支持我的想法。

首先，一个有竞争力的专业可以让我们在就业市场上更具优势。这是因为这些专业的毕业生往往是企业急需的。第二，有竞争力的专业的毕业生通常薪水更高。根据人力资源部2020年的一份就业报告，IT行业本科生的平均月薪可达1万元以上，远高于同龄人。

考虑到上述所有优点，我认为选择一个有竞争力的专业很重要。因此，我们应该把要学的东西放在首位。

范文

It is now widely acknowledged that there are many factors to consider when choosing a university or further studies, such as reputation or facilities of the university. As for me, the most important factor is to choose a competitive major. There are several reasons to support my idea.

First, a competitive major can make us more advantageous on the job market. This is because graduates of these majors are often urgently needed by enterprises. Second, graduates of competitive majors usually have higher pay. According to an employment report of the Ministry of Human Resources in 2020, the average monthly salary of an undergraduate in IT industry can reach more than 10,000 yuan, which is much higher than that of his counterparts.

Considering all the above-mentioned merits, I think it important to choose a major with competitiveness. Therefore, we should put what we will learn in the first place.
